

## **For Immediate Release**

### **Electronic Solutions Releases AdvancedTCA Blank Filler Panels As Well As Standard and Custom Front Panels**

POWAY, CA, August 4, 2005 – Electronic Solutions, manufacturer of Open Architecture Products for bus-based embedded computer market applications, has released standard and customized front panels, as well as, blank filler panels for AdvancedTCA applications. Panel construction is cold rolled steel with a protective zinc plate and includes a standard nickel – copper emi/rfi shielding gasket, ground pins, and captive thumb screws.

Handle latches and PCB mounting hardware are included with both the standard and custom front panels.

Pricing for blank filler panels (FP-ATCA000-100) is under \$20. Custom front panels with a side 2 cover (FP-ATCA280-xxxxx) are \$31 for a quantity of 50. Please contact your regional sales engineer to help work out the best solution for your specific AdvancedTCA front panel application or visit us at [www.apw.com/elsol](http://www.apw.com/elsol).
