Enea Appoints Jim Lawrence as Chief Software Standards Officer

Leading Provider of Network Software and Services Names Communications Veteran to Drive Next Generation Standards-Based Software Platforms

Stockholm, Sweden, and San Jose, CA. June 26, 2007 – Enea (Nordic Exchange/Small Cap/ENEA), a world leading provider of network software and services, today announced the appointment of Jim Lawrence to the position of chief software standards officer, where he will play an integral role in Enea's next generation standards based software platforms.

Jim is a telecommunications industry veteran with over 25 years of experience. During those years he pioneered many telecom technologies and solutions for Motorola, Intel, and OpenClovis. Jim is a member of the Service Availability Forum where he has provided leadership as chair of several working groups and has served on the Board of Directors.

Standards and the process of standardization provide significant additional value to the communications industry and, more specifically to Enea's ability to accelerate the deployment of Enea-enabled communications equipment. Standardization facilitates interoperability, encourages innovation, creates trust and confidence in products, brings down costs, increases competition, reduces project risks, and helps prevent the duplication of efforts.

"Jim Lawrence brings a wealth of technology and standards experience and extraordinary business acumen to Enea," said Virginia Walker, senior vice president of corporate strategy & marketing at Enea. "We are very pleased to bring Jim into the Enea team where he will drive initiatives and development of next-generation, standards-based software platforms."

About Enea

Enea (Nordic Exchange/Small Cap/ENEA) is the leading supplier of real-time operating systems, middleware, development tools, database technology and professional services for high-availability systems such as telecommunications infrastructure, mobile devices, medical instrumentation, and automobile control/infotainment. Enea's flagship operating system, OSE™, is deployed in approximately half of the world's 3G mobile phones and base stations. Enea has over 500 employees and is listed on the OMX Nordic Exchange Stockholm. For further information on Enea, please visit www.enea.com.

OSE is a registered trademark of Enea AB or its subsidiaries. All other company or product names are the registered trademarks or trademarks of their respective owners. © 2007 Enea.
