DTI Offers Enhanced Software and Support for Their 10GbE AdvancedTCA Switch

ATS1936 – ES³ software and support packages

October 28, 2009 – AdvancedTCA Summit, Booth 411 – Diversified Technology, Inc. (DTI) announces the release of ES³ (Enhanced Switch Software Suite) for their ATS1936 AdvancedTCA Switch and corresponding support packages. The ATS1936 represents DTI's 3rd generation of high-bandwidth, feature rich switches for AdvancedTCA. DTI has successfully deployed this switch in many environments, ranging from telecom central offices to military battlefields. The new ES³ software significantly enhances the functionality of the ATS1936 over any AdvancedTCA switch offering currently on the market, and comes with three available tiers of support packages.

“From enhancements to existing features like Spanning Tree Protocol and IPv6 to significant new features such as L2 Failover and IGMP querying, this new ES³ software represents Diversified Technology's commitment to provide a superior product with superior support”, said JP Landry, DTI's Networking Program Manager.

“In addition to the new software, our customers now have the ability to select from three levels of DTI's support packages to service their end-users with exactly what the individual programs require”, said Tom Witt, DTI's SVP of Business Development. “The ES³ stacks and our support structure ensure that the functionality our customers desire is met, and ultimately exceeds their expectations.”

ATS1936

About the ATS1936

Diversified Technology's ATS1936 represents the superior choice for a high functionality, low-cost 10G AdvancedTCA Switch. The enhanced switch software utilized by the ATS1936 ensures the ease and robustness of management, compatibility, and integration. For added functionality and flexibility, the AMC sites may host expansion cards dedicated to OA&M, network security, encryption, and more. Combined with DTI's cohesive approach to embedded solutions, the ATS1936 truly represents the best choice in 10G AdvancedTCA switches. Visit DTI's website for more details on the ATS1936 and to download the product's technical datasheet showing a full list of the supported features and protocols within the ES³ Packages.

ATS1936 Availability

Production shipments for the ATS1936 are available now. ES³ and corresponding support packages are available starting in Q4/2009.

Contact DTI Sales for details on the Support Package. (1-800-443-2667, sales@dtims.com)

About Diversified Technology, Inc.

Diversified Technology, Inc. (DTI) is an embedded hardware company whose strength lies in the cohesive approach we use with our customers. This cohesive approach means DTI works hand-in-hand with companies to ensure they are getting the best performance, highest reliability, shortest time-to-market and the most efficient use of computing hardware for their program's embedded application. DTI, an Ergon Company, was founded in 1971 and has a history of design experience with standardized form factors from PICMG. (www.dtims.com)
